EXPEDITED PROCEDURE
EXAMINING GROUP 3676

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of

Pekka MIELONEN et al

Application No: 09/405,436

Filed: September 23, 1999

For: CYLINDER LOCK-KEY-COMBINATION

Art Unit: 3676

Examiner:
Lloyd A. Gall

Official

FAX RECEIVED

MAR 03 2003

GROUP 3600

REPLY TO THE OFFICE ACTION MAILED 12/17/2002

Assistant Commissioner for Patents
Box AF
Washington, D.C. 20231

Sir:

Further examination and consideration of this application are requested in view of the following Remarks.

REMARKS

The examiner has repeated and made final the requirement for restriction made in the Office Action mailed September 6, 2002. The examiner has previously acted on the merits of claims 1-12, 14-20 and 22-27 (see the Office Action mailed March 12, 2002). In order to avoid the inconvenience and delay of a petition against the requirement for restriction, applicant requests that the examiner should continue to treat the claims to the key blank and the key as being drawn to the same invention as the claims to the lock and key combination.

The examiner has asserted that Group I and either Group II or Group III are related as combination and subcombination, and that inventions in this relationship are distinct if it can be shown (1) that the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations. Both requirements must be met.
